OBJECTIVE

Computer Science undergraduate at KLH seeking software development internships to apply programming, web development, and problem-solving skills while gaining hands-on industry experience.

EDUCATION

Bachelor of Computer Science, Koneru Lakshmaiah University — 2028 Expected

EXPERIENCE

AI & Machine Learning Virtual Intern — Apr 2025 – Jun 2025
AICTE – EduSkills — Google for Developers — *Virtual*

- Completed a 10-week virtual internship covering AI/ML fundamentals and guided labs
- Worked with data preprocessing concepts and basic ML models

Cloud Computing Virtual Intern — Jul 2025 – Sep 2025
AICTE – EduSkills — AWS Academy — *Virtual*

- Learned cloud fundamentals including compute, storage, networking, and security

Full Stack Development Trainee — Nov 2025
Simplilearn SkillUp — *Online*

- Trained in HTML, CSS, JavaScript, and responsive frontend development

JavaScript Developer (Foundations) — Nov 2025
Cisco Networking Academy — *Online*

- Completed JavaScript Essentials 1 & 2 covering scripting and DOM basics

ReactJS Trainee — Nov 2025
Simplilearn SkillUp — *Online*

- Learned React fundamentals including components, props, state, and JSX

GitHub Foundations — Nov 2025
Microsoft Learn — *Online*

- Practiced Git workflows, version control, and repository collaboration

Object-Oriented Programming in Java — Nov 2025
Simplilearn SkillUp — *Online*

- Studied OOP concepts including inheritance, polymorphism, and encapsulation

Operating Systems Fundamentals — Nov 2025
Scaler Topics — *Online*

- Learned processes, memory management, and CPU scheduling basics

PROJECTS

TriviaChamp – Quiz Application OOP-based quiz application with modular classes for questions, scoring, and user interaction.

Personal Finance Analyzer Analyzed messy bank statements using data cleaning and visualization to derive spending insights.

AI Visual Storytelling from PDF Generated context-aware images for each page of a PDF to create a visual reading experience.

E-commerce Order Tracker Real-time order tracking system using backend APIs and dynamic status updates.

Regression Model (Python) Implemented a regression model with preprocessing, training, and evaluation for prediction tasks.

EXTRA-CURRICULAR ACTIVITIES

- Actively participate in football, promoting teamwork, discipline, and physical fitness
- Practice calligraphy as a creative hobby, demonstrating patience and attention to detail
- Play the piano, developing consistency, focus, and creative expression

LEADERSHIP

- Assisted peers in understanding programming concepts and debugging during labs and project work
- Encouraged collaboration and knowledge sharing within academic teams
